About This Game

Have you ever wondered why, individually good and peace-loving citizens, merging into society, allow the coming to power of forces that have diametrically opposed principles and goals? "**Norman's Great Illusion**" is our attempt to talk about this phenomenon.

There are no Battle Royale mode, no microtransactions, no season passes, no lootboxes.

The game is 18+, but there is no sexual content in it. The game is for quite intelligent, conscious users.

"**Norman's Great Illusion**" is a 2D pixel art visual novel in which you have to live a year as an engineer at the plant in the face of rising social tensions. Make difficult decisions, but keep in mind: you will have to pay for each choice.

If You:

- do not distinguish the class struggle from the spiritual struggle;
- believe that imperialism has died with the last emperor, please DO NOT BUY our game. To all the rest: "Welcome!"

Features:

- difficult moral choices;
- 7 different endings;

-
- 2 mini-games; and
 - stylish 2D pixel art graphic.
